

ECM Full-Time Equivalent Student Calculator

The Formula:

$$\frac{\text{Total \# student attendance hours/week}}{\text{Total \# ECM open hours/week}} = \# \text{ FTE students}$$

Example: (Use actual values for your school)

Assuming:

Half-day = 4 hours

Full-Day = 8 hours

ECM open hours/week = 40

18 students attending 3X/week for half-day

10 students attending 2X/week for half-day

8 students attending 5X/week for full-day

Step 1

18 x 12 hours/week = 216 student attendance hours/week

10 x 8 hours/week = 80 student attendance hours/week

8 x 40 hours/week = 320 student attendance hours/week

616 total student attendance hours/week

Step 2

616 total student attendance hours/week = **15.4 FTE students**

40 ECM open hours/week
